

Flow Café

Client: Jumeirah Group
Consultant: Bishop Design / TUV - SUD - Wallace Whittle
Contractor: BW Interiors

Scope: Supply, Testing, and Commissioning
of Light Fixtures & Dimming System
Time of Execution: 8 weeks

Flow, the latest outlet to open doors on the first floor of Emirates Towers Hotel, is more than just a healthy eating coffee shop. The creative hub, fleshed out by the interior design team at Bishop Design, MEP consultants TUV - SUD - Wallace Whittle and managed by Compass Project Management, is an embodiment of the social initiative undertaken by the Emirates Youth Council.

Creation was retained by the MEP division of BW interiors for the supply, testing and commissioning of lighting and dimming systems on a very tight schedule, based on the confidence

they had in our capability to deliver the project on time.

It is Mode Lighting's Control Systems which integrate the numerous architectural and decorative brands within the 'Back of House' and 'Front of House' areas.

At Flow, the brief to create a modern space to inspire youth to connect, create and converse in a purpose-built environment, complete with plugs, USB connections and Wi-Fi demanded clean clutter free fittings that enabled such interaction.
