

Carnival by Tresind

Client: Passion F & B
 Consultant: DPA Lighting, Dubai
 Contractor: Exceptional Interior Design

Scope: Supply, Testing, and Commissioning of Light
 Fixtures & Lighting Control System
 Time of Execution: 8 weeks

Carnival - Dubai's latest uber chic eatery at DIFC is a fun-fair themed restaurant designed by Modo Milano. It is DPA's lighting design and Creation's dimming systems that have breathed light into the exotic space that embraces a cascade of rich prints, colours and textures. The fun filled ambience comes alive through a range of lighting features that include smooth transitions, adjustable fade times and a time clock to deliver just what the designers had conceived an unreal, mythical even space where food, fun and frolic rule supreme.

Mode Lighting U.K.'s dimming systems, Pharos Controls DMX control systems, Forma Lighting Italy's track lights along with scene settings over

the reception area, the display windows, the general dining section, the bar and private dining space has the restaurant's ambience always set to warm and cozy. X-LED, Germany's RGB Nodes were implemented for the bespoke bottle display and this called for the customization of the pixel pitch which had to match the site requirements.

For Creation to be able to integrate a system from multiple brands such that the end user can enjoy a single system with an identical user interface for both the dimming and DMX control system is a reflection of our sheer expertise in finding simple solutions to resolve complex challenges.
