

Hilton Residences

Client: Umbel Properties
Consultant: DPA Lighting, UK
Contractor: Synergy Property Development Services Pvt. Ltd.

Scope: Supply of Light Fixtures for Guest Rooms and Public Areas
Time of Execution: 6 months

Overlooking the Karnataka Golf Course, The Hilton Residences, is a modern hotel located within Embassy Golf Links Business Park - the hub of several Fortune 500 companies in Bangalore, India.

To convert DPA Lighting's plan to reality, Creation was brought on board. We tapped a variety of manufacturers from Europe to ensure that the light fixtures in the guest rooms and public areas matched the original design specifications laid down by DPA Lighting.

While it is relatively simple to supply a fixture specified by a designer, finding an equivalent to match the original as closely as possible entails a whole new degree of difficulty, especially in the wake of time and budgetary constraints.

Today, the Hilton Residences stands as a feather in our list of projects because it bears testimony to our skills of meeting (not only client's but the designer's) needs capably and efficiently. More importantly, we added one more satisfied high-profile customer to our existing list.
